Aircraft Highlights

This beautiful Volcanic Red Pearl R66 was manufactured in 2012 and currently has 820 hours remaining on the airframe. The current owner reached the cycle limit before the aircraft TBO; subsequently, the engine was overhauled this past November 2020. This helicopter has been meticulously maintained and per Robinsons Instructions of Continued Airworthiness. The owner has spared no expense on overall upkeep and maintenance.

The aircraft operates in a dry arid environment, and there has been no issue with corrosion, giving the new owner peace of mind. Also, the owner has hangered the helicopter in a climate-controlled space since day one.

With a beautiful interior/exterior, this helicopter is perfect for both the operator and private owner. Don't let this R66 fly away. Schedule a showing today with your team at Sellacopter!
